## Test & Measurement

- sales
- rentals
- calibration
- repair
- disposal

## Complimentary Reference Material

This PDF has been made available as a complimentary service for you to assist in evaluating this model for your testing requirements.

TMG offers a wide range of test equipment solutions, from renting short to long term, buying refurbished and purchasing new. Financing options, such as Financial Rental, and Leasing are also available on application.

TMG will assist if you are unsure whether this model will suit your requirements.

Call TMG if you need to organise repair and/or calibrate your unit.

If you click on the “Click-to-Call” logo below, you can call us for FREE!

# Z-Active™ Differential Probe Family

► P7313 • P7380 • P7360

## Z-Active™ Probing Architecture Leads the Way for High-speed Probing Applications

Tektronix has created a revolutionary Z-Active probe architecture that sets the industry benchmark for signal fidelity. Tektronix active probe architecture preserves high bandwidth while providing improved connectivity with low loading. The Z-Active architecture is a hybrid approach composed of a distributed attenuator topology feeding an active probe amplifier.

The Z-Active probes use a tiny passive probe tip element that is separate from the amplifier, extending the usable reach of the probe. In traditional active probes, adding this much length can introduce signal fidelity problems. However, this architecture maintains high DC input resistance and presents a higher AC

impedance than previous probe architectures. It accomplishes this while providing significant length between the probe body and the probe attachment point to the DUT. This architecture provides the best of both worlds: high DC impedance like existing active probes and the stable high frequency loading of  $Z_0$  probes.

### Signal Fidelity

You can be confident in the signal fidelity of your measurements because the Z-Active architecture provides:

- High bandwidth
- Excellent step response
- Low loading
- High CMRR

## ► Features & Benefits

### Signal Fidelity

- >12.5 GHz Bandwidth (P7313 Only, Typical)
- >8.0 GHz Bandwidth (P7380 Only, Typical)
- >6.0 GHz Bandwidth (P7360 Only, Typical)

### Low Probe Loading

- DC Input Resistance
  - 100 k $\Omega$  Differential
  - 50 k $\Omega$  Single-ended
- AC Loading
  - $Z_{min} >200 \Omega$  Out to 10 GHz

### Versatility

- Make Differential or Single-ended (Ground Referenced) Measurements<sup>\*1</sup>
- Solder Down Capability
- Handheld Probing with Variable Spacing and Compliance (>8 GHz)
- Fixtured Probing

### Interchangeable Tip-Clip™ Assemblies

- Connect to a Variety of Devices
- Economical

TekConnect® Interface

## ► Applications

Examples Include, but Are Not Limited to:

- PCI-Express I and II, Serial ATA II, USB 2.0, DDRII, Rambus, XAU

<sup>\*1</sup> For details, please see application note 60W-18344-0, "Making Single-ended Measurements with Differential Probes."

## Z-Active™ Differential Probe Family

► P7313 • P7380 • P7360

### Connectivity

This family of probes uses Tip-Clip™ assemblies, an interchangeable probe tip system that enables customers to configure their probe with the optimal tip for their application. These detachable assemblies make it possible to replace a tip for a fraction of the cost formerly associated with such hardware changes.

The several lengths and variable spacing of the assemblies provide flexibility for adapting to vias and other test points of differing sizes. With Tektronix Tip-Clip assemblies, Monday's solder-in probe can become Tuesday's handheld tool, simply by switching tips. The Z-Active probe design allows the probe to easily switch between solder, handheld or fixtured applications.

### Value

The combination of the Z-Active architecture and the Tip-Clip assemblies provide superior signal fidelity at a cost-effective price. The inexpensive Tip-Clip assemblies enable full performance solder connections at a very low price per connection. Over the life of a probe this can add up to significant savings in the cost of operation.

## ► Characteristics

	P7360	P7380	P7313
Bandwidth (Typical)	>6 GHz	>8 GHz	>12.5 GHz
Rise Time (10% to 90%) (Guaranteed)	<70 ps	<55 ps	<40 ps
Rise Time (20% to 80%) (Typical)	<50 ps	<35 ps	<25 ps
Attenuation	5X or 25X, user selectable		
Differential Input Range	±0.625 V (5X) ±2.0 V (25X) P7380, P7313 ±2.5 V (25X) P7360 only		
Common Mode Input Range	+4.0 V to -3.0 V		
Offset Voltage Range	+4.0 V to -3.0 V		
DC Input Resistance	100 KΩ		
AC Loading (Differential $Z_{min}$ )	>290 Ω	>290 Ω	>200 Ω
Noise	<30 nV/√Hz (5X) <75 nV/√Hz (25X)		
CMRR	>50 dB at 1 MHz >35 dB at 1 GHz >20 dB at 6 GHz	>50 dB at 1 MHz >35 dB at 1 GHz >20 dB at 8 GHz	>50 dB at 1 MHz >35 dB at 1 GHz >20 dB at 6 GHz >15 dB at 12.5 GHz
Non-destructive Input Range	±15 V		
Interface	TekConnect®		
Cable Length	1.5 m	1.2 m	1.2 m

## ► Ordering Information

**P7313**

>12.5 GHz Differential Probe for TekConnect® Interface.

**Includes:** See Standard Accessories table.

**P7380**

>8.0 GHz Differential Probe for TekConnect® Interface.

**Includes:** See Standard Accessories table.

**P7360**

>6.0 GHz Differential Probe for TekConnect® Interface.

**Includes:** See Standard Accessories table.

## ► Standard Accessories

Description	P7360	P7380	P7313	Reorder Part Number
Pouch, Nylon Carrying Case with Inserts	1 each	1 each	1 each	016-1952-xx Qty 1
Accessory Performance Summary and Reorder Sheet	1 each	1 each	1 each	001-1389-xx Qty 1
User Manual – Printed. Includes Reply Card and CD	1 each	1 each	1 each	020-2640-xx Qty 1
BNC (M)-to-Minigrabber Adapter	1 each	1 each	1 each	013-0342-xx Qty 1
Anti-static Wrist Strap	1 each	1 each	1 each	006-3415-xx Qty 1
Magnifying Glasses	1 each	1 each	1 each	378-0486-xx Qty 1
Calibration Data Report	1 each	1 each	1 each	Opt. D1
