OLT-55 SMART Optical Loss Test Set

A SMART, Future-Proof Optical Loss Test Set

Key features

- Industry's first auto-zeroing function provides outstanding accuracy even for high loss measurements with no manual zeroing necessary.
- Auto-lambda function with TWINtest and new TRIPLEtest provides automatic wavelength detection to speed up testing. Up to three different wavelengths are measured and displayed simultaneously.
- Reflection trap at the power meter's input reduces multiple reflections between adapter and photo diode, allowing for increased accuracy (adapter BN 2014/00.xx).
- Laser source with output level adjustment to ensure correct power for individual applications.
- Client USB interface for easy remote control and report generation.
- Visual fault locator option at 635 nm
 - Economical option for fiber tracing, routing, and continuity checking
 - Universal push-pull adapter 2.5 mm (1.25 mm adapter optional)
- Host USB data storage option
 - Unlimited result storage capacity via USB memory sticks
 - Easy and quick data transfer of stored measurement results

New

New

JDSU's SMART optical handhelds go beyond the basics

JDSU SMART optical handhelds help your network move to the next level of performance. JDSU's SMART optical handhelds encompass a new, intelligent, and next level product line for testing all optical signals and systems, including broadband, PONs, and Gigabit Ethernet.

All of JDSU's SMART optical handhelds provide:

- An extended number of calibration wavelengths for the highest performance range in the industry.
- The SMARTStar graphical user interface for fast, easy, and straightforward operation.
- The SMARTEnergy power supply management system.
- The SMARTBag for safe and hands-free operation and transport.
- A USB port for remote operation as well as easy Microsoft Excel™-based report generation and analysis.
- Traceable measurements to international standards for confidence in accuracy.
- A robust, shock-proof, and splash-proof design for field operation.
- Quick start operation, requiring no warm-up time and reducing testing time.

The new **OLT-55 SMART Optical Loss Test Set** is a high-performance, easy-to-use instrument with a two or three wavelength laser source in combination with a power meter. It is a universal instrument for singlemode fibers and systems for lab, manufacturing (USB interface), installation, maintenance and troubleshooting.

Loss can be measured simultaneously at up to three wavelengths (Tripletest). Quick Referencing for all built-in wavelengths can be effected independent of the current measurement mode. Just connect source and power meter with a fiber patch cord.

OCK-10 Optical Connector Cleaning Kit (accessory)

OOIM-400 Fiber Microscope

Optical adapters (BN 1014) for power meter output

Optical adapters (BN 2150) for laser source output

Worldwide compatible AC adapter/charger (SNT-121A)

Additionally, the OLT-55 can be used as a stand-alone power meter or laser source with all features of the corresponding OLS-55 and OLP-55.

It creates a new industry standard with its built-in auto-zeroing function for best accuracy even for very low power levels or high loss measurements.

Dust cap for the optical interface

Visual fault locator (option)

Host USB port (option)

Shock-proof design

Display (128 x 64 dots) shows up to three results simultaneously

Backlight for the display

Menu-oriented operation for simple use

Power-on, auto power-off (after 20 min)

Client USB connection

(1) ± 20 nm typically(2) At ambient temperature range -10°C to $+55^{\circ}\text{C}$, $\Delta T = \pm 0.3$ K(3) At ambient temperature $23^{\circ}\text{C} \pm 3$ K

(4) CW signal

(5) Works only with JDSU OLT-55 or an external OLP-55 power meter

Specifications

Wavelength detection⁽¹⁾ with automatic switching and display of nominal wavelength
Fiber detection with different modulation frequencies

Data memory	1000 measurement results
Data readout/remote control	via USB interface
Modulation detection ⁽²⁾	270 Hz, 1 kHz, 2 kHz
Auto-lambda (λ) detection: 850 nm to 1650 nm (with any JDSU Optical Laser Source)	

Memory

Data memory	1000 measurement results
Data readout/remote control	via client USB interface
USB data storage (option)	via Host USB interface

Display

Illuminated graphical display, resolution of 128×64 dots, displays up to three power readings simultaneously
Backlight function switchable via a separate key

Optical connector

Power meter

Interchangeable adapter from BN 2014/00.xx range, suitable for measurements on flat or angled physical contact systems
2.5-mm plugs: FC, ST, SC, DIN, E2000, SMA
1.25-mm plugs: LC, MU adapter (BN 2014/00.28)

Laser source

Interchangeable adapter from BN 2150/00.xx range for flat physical fiber connection. One adapter type has to be selected.

Power supply

Four dry batteries Mignon/AA, 1.5 V or NiMH rechargeable cells Mignon/AA, 1.2 V
Operating time from dry batteries⁽³⁾ >100 h
Batteries/NiCd/NiMH power saving:
The instrument switches off automatically after ~20 min (function can be disabled)
AC line operation via separate AC adapter
Integrated fast battery charging function (2 hours)

Electromagnetic compatibility

Corresponds to IEC 61326 (CE conformance)

Calibration

Suggested calibration interval 3 years

Ambient temperature

Nominal range of use	-10°C to +55°C
Storage and transport	-40°C to +70°C

Dimensions and weight

W × H × D approximately	95 × 60 × 195 mm (3.74 × 2.36 × 7.68 in)
Weight approximately	500 g (1.1 lb)

(1) Only together with OLS-55 Optical Laser Sources

(2) From -45 dBm (780 to 1299 nm), from -50 dBm (1300 to 1625 nm)

(3) Power meter mode
