GasAlertMicroClip

H₂S, CO, O₂, Combustibles

Multi-Gas Detector

The GasAlertMicroClip offers simultaneous monitoring of up to four gases (H₂S, CO, O₂ and combustibles) in a rugged, ultra-compact housing perfectly suited for confined space entry, HAZMAT response and a wide range of other applications requiring gas monitoring.

The simple one-button operation provides ease of use in potentially hazardous situations. To provide optimum user safety, the GasAlertMicroClip also features audible, visual and vibrating alarms in the event of Low, High, TWA and STEL alarm conditions.

With user selectable options and a rechargeable lithium polymer battery providing 12 hours of run-time (typical), the GasAlertMicroClip will meet the needs of many atmospheric monitoring situations.
