TECHNOLOGIES

# Introducing the new range of mapping technologies from Radiodetection

- Flexible mapping solutions
- Quick and accurate mapping
- Fast and easy to set up

# RD8200 SG

Survey Grade

## Create and maintain utility maps in a single operation

- Map while you locate
- Integrate utility locating into your mapping procedures.
- Integrate mapping into your utility locating procedures, fluently
- Flexibility to work with the system that suits your business

## Radiodetection's most advanced, combined mapping and locating solution

- Lightweight and ergonomic
- Advanced rugged design to combat harsh weather conditions and temperatures
- Engineered and built to the highest standards

## Strike reduction contributes to:

- Increased safety
- Improved service integrity
- Better cost control
- Lower insurance liabilities
- Enhanced reputation

# RD Map+

The RD Map+ and Trimble® Catalyst™ DA2 adds beneficial survey grade positions to standard locating equipment, achieving all your mapping needs.

## RD Map+

- Real-time maps with target accuracy indicator
- Add measurements directly from the locator
- Records all significant utility measurements
- Easy correction of position inaccuracy

## Trimble Catalyst DA2

- Multi-band (L1, L2 and L5) GNSS antenna
- Scalable accuracy, down to centimeter level
- Yearly or monthly subscriptions for frequent use or project specific jobs
- On-demand hours for more infrequent use
- Can be used with most Radiodetection locators
- No complex setup or need for an additional sim card
- Locate and map in one single operation
- Easily share survey maps from the field

## MAP IT YOUR WAY

Flexibility is at the heart of our mapping solutions, allowing customers to choose the solution that is most suitable for their business. We offer turnkey solutions for those new to the world of utility mapping, while utility mapping experts can connect into their advanced systems.
